

## Environmental Scientist II (SWPPP-SPCC)

**Location:** Stibnite Gold Project - Stibnite, Idaho, USA

**Salary:** Competitive

**Employment Type:** Full-Time

**Application Deadline:** Position open until filled

---

### About Perpetua Resources

Perpetua Resources is an Idaho-based company committed to responsible mining and environmental stewardship. Our mission is to restore the abandoned Stibnite Mining District while responsibly developing its rich resources of gold and antimony—an essential mineral for national defense and sustainable technologies.

#### Why Join Us?

- **Environmental Restoration:** Be part of a team dedicated to restoring ecosystems and improving water quality in historically impacted mining areas.
- **Innovative Projects:** Contribute to the Stibnite Gold Project, designed to responsibly develop critical mineral resources while rehabilitating the environment.
- **Community Engagement:** Work with a company that values transparent partnerships and actively invests in local communities.
- **Professional Growth:** Join a diverse team of scientists, engineers, and environmentalists committed to excellence and innovation.

At Perpetua Resources, we believe in balancing resource development with environmental care to create a sustainable future. Join us in making a lasting, positive impact on Idaho and beyond.

### About The Position

Under limited supervision, and reporting to the Senior Environmental Scientist (Water Programs) or the Environmental Superintendent, the Environmental Scientist II performs critical Spill Prevention Control and Countermeasure (SPCC) and Stormwater Management functions including, but not limited to; performing field inspections, ensuring compliance with and preparing regulatory reports

for the Stibnite Gold Project Multi Sector General Permit (MSGP) – Sector G Stormwater Pollution Protection Plan (SWPPP), oversight and update of numerous Construction General Permit(s) (CGP) SWPPP's, and oversight and direction of the project Spill Prevention Control and Countermeasure (SPCC) Plan. Assists and coordinates with multiple environmental technicians supporting inspections and project construction teams and internal water monitoring/treatment staff.

### **Essential Duties and Responsibilities**

- Manages the Stibnite Gold Project MSG permit and several CGPs with the Idaho Department of Environmental Quality, including but not limited to, oversight of stormwater pollution protection plans; ensures stormwater quality and permit compliance.
  - Manages the Stibnite Gold Project SPCC plan inspections in coordination with Perpetua owners team and construction partners.
  - Work with multidisciplinary external and internal team on periodic SPCC plan updates.
  - Inspections of erosion and sediment control measures across the project site and remote facilities.
  - Oversees and monitors the maintenance of documentation to ensure accurate and timely recordkeeping for regulatory information and reporting.
  - Collaboratively work with multidisciplinary project team, daily interaction with contractors and subcontractors.
  - Reviewing and updating of stormwater pollution prevention plans (SWPPPs) for construction sites.
  - Installs, operates, and maintains environmental and emission monitoring instruments and testing equipment; analyzes data for compliance with regulatory requirements
  - Evaluates and assesses environmental risk and develops programs for risk reduction
  - Collaborates with management and recommends appropriate action to maintain compliance with regulations
  - Reviews and/or prepares and maintains detailed records and files of environmental data and communications
  - Evaluates and administers contracts with vendors for the provision of services and equipment
  - Ensures work is performed following established procedures and standards;
  - Oversees and inspects the work of employees and contractors to ensure Best Management Practices (BMP) and control measures are met, materials used meet specifications, and appropriate testing requirements.
  - Maintains knowledge of site environmental policies and procedures
  - May provide leadership to less experienced Engineers and Technicians
  - May serve as Project Manager or technical expert on small to medium-sized environmental projects (e.g., compliance, remediation, or reclamation)
  - Leads or participates in regular audits and inspections of operations areas for purposes of ensuring compliance with site environmental policies, procedures and requirements of the Environmental Management System
  - Other tasks include scientist/engineer related work, as appropriate by applicant's background and discipline, such as NPDES, CERCLA, RCRA, Environmental, Hydrological and Geotechnical related work.
  - Performs other duties as appropriate or necessary for performance of the job.
-

## Schedule & Logistics

The Environmental Scientist will be based at Perpetua's project site in Stibnite, Idaho. The employee is required to provide his/her own transportation to the Donnelly office. Transportation from the Donnelly office to site or other work locations will be provided by Perpetua. It is noted that the company is transitioning from the exploration/permitting phase of the project to construction/operations and a nonstandard schedule such as an 8 days on and 6 days off schedule but is subject to change as required by company needs.

---
