## LETTERS OF SUPPORT FOR THE STIBNITE GOLD PROJECT!

Perpetua Resources' Stibnite Gold Project has received an unprecedented level of public support. During the 2020 and 2022 comment periods, approximately 85% of feedback was positive. By listening to our communities, Perpetua Resources has made the Stibnite Gold Project the best it can be.

### This is NEPA at work:

- ◆ **2010 - Perpetua begins** study, engineering and community engagement.
- ◆ **2016 - NEPA review begins** under joint review process.
- ◆ **2020 - 75-day Public Comment Period** on the Draft Environmental Impact Statement.
- ◆ **2020 - Perpetua proposes improvements** based on 10,000 comments received.
- ◆ **2022 - 75-day Public Comment Period** on the Supplemental Draft Environmental Impact Statement, which closed with over 15,000 comments supporting the project.
- ◆ **2024 - After 14 years** of working to make the Project right for Idaho, it's time to move forward.

### Listening Made It Better:

- ◆ **13% reduction in project footprint** over original design.
- ◆ **70% reduction in Hangar Flats Pit** over original design.
- ◆ **20+ miles of habitat opened** for migrating fish.
- ◆ **96% reduction in arsenic in Meadow Creek** (below Tailings Storage Facility) vs. existing conditions.
- ◆ **40% reduction in arsenic in EFSF Salmon River** (below Sugar Creek) vs. existing conditions.
- ◆ **140% uplift in wetlands quality** (wetland functional units).
- ◆ **63% net increase in wetland acres** vs. existing conditions.
- ◆ **9.5% uplift in stream habitat quality** (stream functional units).
- ◆ **Water temperature reduced** to be at, or below, existing conditions.
- ◆ **60% reduction in mercury emissions** over original project design to be less than 20% of applicable EPA standards.
